## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-19, it is not clear as to what the "stream specific information" represents, i.e. it is not clear whether it refers to management information, error information, user data, TOC etc.. Also it is not clear as to what the "information linking the stream specific information" refers to. Further, it is not clear as to what the "stream object" refers to. Clarification is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2651

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Abiko (4,835,757).

Abiko discloses the invention as claimed. Note Figs. 1A-11 show the method and apparatus for recording stream specific information (taken be to the error information) along with data stream in a disk having: the steps for checking whether steam specific information requires to be changed while recording the data steam in the disk (S3 and S4); the steps for generating stream specific information adequate to the data stream being recorded based on the checked results (S5 and S6); and the writing step for writing the recorded stream specific information and additional information linking the stream specific information with a stream object (S7-S9), as set forth by the claims. See also the description of the apparatus and figures for further details relating to the limitations as set forth in the dependent claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Otsuka (6,094,723) discloses an optical disk apparatus for recording and reproducing information having the capability of checking and recording management information.
